## Continuation of rejections discussed:

Objection to claim language considering that preamble does not positively recite club head, while the body of the claim details particulars of the club head. Thus, it is unclear whether or not the golf club head is being recited in combination with the alignment assembly.

## Continuation of Substance of Interview including description of the general nature of what was discussed:

It was agreed to amend claim 9 to include language in the preamble to clearly recite the combination of a golf club head and an alignment assembly. It was further agreed to amend the specification to provide proper antecedent basis for the claimed subject matter now provided in claims 1 and 12 with respect to the thick and thin portions, with these features being clearly shown in originally filed Figures 10A and 10B. .
